

Who is *YOUR* reason to Relay?

What if you could honor that person by participating in research that will help understand the factors that prevent cancer and save more lives?

This year **ONLY**, you have that opportunity.

Enrollment for the American Cancer Society's Cancer Prevention Study-3 (CPS-3) will take place at your Relay For Life.

Who can join the study?

Anyone between the ages of 30 and 65 who has never been diagnosed with cancer and will commit to the study long term.

How can you participate?

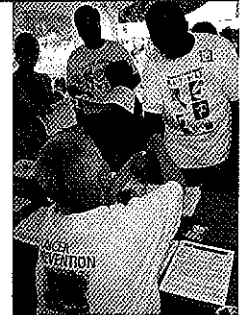

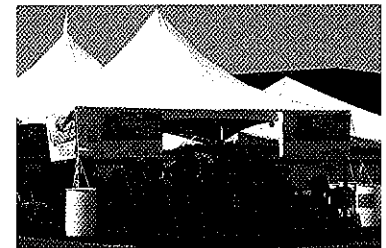

You can enroll at Relay For Life. Enrollment is a simple, two-phase process:

At Relay, you will be asked to complete a brief survey, provide a waist measurement, and give a small amount of blood (similar to a doctor's visit), collected by a certified, trained phlebotomist.

At home, you will also be asked to complete a more detailed survey that asks questions related to your medical history, lifestyle, and behaviors. Periodically, you will receive a survey at home asking you to update that information.

What else can you do?

Tell everyone you know about this one-time, historic opportunity to make a difference in the fight against cancer and to celebrate the cancer survivors in your life.

For more information, visit www.cancer.org/cps3 or call toll-free 1-888-604-5888.
